DETAILED ACTION***Election/Restrictions***

1. Claims 18-24 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 09/28/05.

Claim Rejections - 35 USC § 102

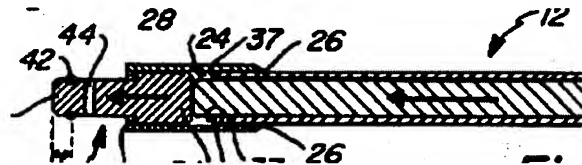

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 25-30 are rejected under 35 U.S.C. 102(b) as being anticipated by AAPA, i.e., FRAME HAMMER™.

FRAME HAMMER™ as shown, and substantially corresponding to the tool as in the parent application, meets all the limitations of claims 25-30, e.g., an impact extension having means to support a removable tip and being capable of meeting the steps of process claimed.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

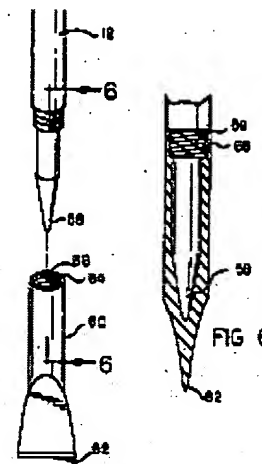

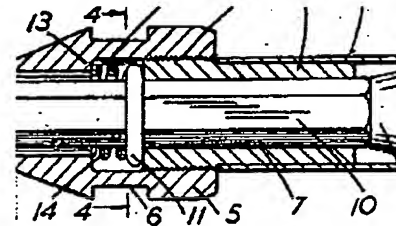

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3723

5. Claims 25-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA, French Patent 912,611 in view of Evinger (5,370,192).

French '611 meets all the limitations of claims 25-30, except for disclosing attaching a removal tip to the impact extension (8). Evinger teaches slide hammers having different tips attached to the impact extension. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the tool of French '611 with the removable tips as taught by Evinger to adapt the tool for different applications.

Regarding the dependent claims the modified tool of prior art meets the limitations, i.e., changing the tip and repeating the action.
